

Concrete Feed Troughs

- **Swift lift lifting system for ease of moving**
- **Reinforced fibre concrete**
- **Durable and safe for stock**

Description	Length (mm)	Width (mm)	Height (mm)	Weight (kg)
Double feed	1500	1500	515	1000
Double feed with end	1600	1500	515	1070
Single feed	2800	900	600	1250
Single feed with end	2900	900	600	1320

Great Southern concrete feed troughs have been specifically designed to be used on cattle feed pads as an increasing number of farmers are using this feeding system to maximise feed inputs, and minimise pasture damage in wet periods
